Mr. Charlie Wolcott

“Radiometric Dating: Why Scientists Should Break Up with the Method”

Radiometric dating methods are the darling of the secular, mainstream academic community. Yet upon closer study, these methods, often considered to be one of the "pillars" of the Evolutionary, naturalistic worldview, do not pass muster on the basics of scientific scrutiny. How can Christians give an answer for these "rock solid" scientific data and remain standing on the Bible's record? Charlie Wolcott will showcase that there is no internal integrity to these methods and how they never passed or even went through the basic levels of testing that every other piece of technology we use had to go through. Get equipped to see through the deception and the smoke and mirrors and see that no challenge against the Word of God will pass scrutiny.

About Mr. Wolcott:

Charlie Wolcott is an AP Physics teacher out of El Paso, Texas and a speaker, author, and blogger for Worldview Warriors. He has studied the topic of origins for 20 years and graduated from the 11th "Cadre" of the Creation Truth Foundation in 2015, commissioned to teach the issues of origins and to defend the Biblical worldview starting in Genesis. One of his personal projects has been to analyze the mathematical integrity of radiometric dating methods and has found numerous fatal flaws in the system. In July, 2023, he presented a poster at the 9th International Conference on Creationism on his research and will be looking to write a full paper for the next conference. He is the author of five books and in between all that, he coaches a fencing club at his school and still competes in the sport.

**What is
Radiometric
Dating and Why is
it Important?**

Is it valid?

**Charlie has found
fatal flaws in the
method!**
