## **Dr. Ed Holroyd**

### **“Grand Canyon Studies”**

The Grand Canyon of Arizona is the most important landscape on earth to be explained by competing creationist and evolutionist paradigms. Dr. Holroyd recently completed research with Dr. Steve Austin and Dr. David McQueen regarding the formation of the Grand Canyon and will share the highlights of that research with us. (Their work was published in ARJ, Volume 13)

**About Dr. Holroyd:** Dr. Ed Holroyd has a versatile and interesting background. He holds a B. S. in Astrophysics and a PH.D. in Atmospheric Science. Recently, his interest in Geology has led him to continuing education at the Colorado School of Mines. He has worked as a research scientist for C.S.I.R.O. in Sydney, Australia and for the U. S. Bureau of Reclamation. He has taught university classes in remote sensing and image processing at the University of Denver and satellite remote sensing at Webster University.

**Dr. Holroyd has spent many years as a research scientist and instructor.**

---

**He will share interesting research on the Grand Canyon!**

---

**Why is the Grand Canyon so important to creationists?**

---

**Come hear Dr. Holroyd's Research!**
