Dr. Jake Hebert

Institute for Creation Research

Topic: "The Mystery of the Ice Age"

Did Earth experience an ice age? If so, how many, and how do they fit into biblical history? Learn how secular scientists have difficulty explaining an ice age, how the secular ice age theory contributes to climate change alarmism, why deep ice cores do not prove an old earth, and how the Bible gives us a convincing explanation for the Ice Age.

About Dr. Hebert:

Dr. Jake Hebert earned a master's degree in physics in 1999 from Texas A&M University and a Ph.D. in physics in 2011 from the University of Texas at Dallas, where he did cutting-edge research on the connection between cosmic rays, solar activity, and weather and climate. He has taught at both the high school and university levels. He joined ICR in 2011 as a research associate and is currently researching the post-Flood Ice Age, the dating methods used to assign ages to the seafloor sediments and deep ice cores, and cosmology, among other research endeavors. He is the author of *The Ice Age and the Flood: Does Science Really Show Millions of Years?* and *The Climate Change Conflict: Keeping Cool over Global Warming*. He is also a contributor to *Guide to Creation Basics*, *Creation Basics & Beyond*, and *Guide to the Universe*.

**Dr. Hebert is a
research
associate at the
Institute for
Creation
Research!**

**Multiple Ice Ages
or Just ONE? Find
out on February
6th!**

**Join Dr. Hebert as
he discusses the
ice age following
the flood.**

**Dr. Hebert has
done cutting edge
research on the
ice age, weather
and climate!**
