

March 13, 2025, 7:00 PM **Mr. Brian Mariani** **"Astronomy: Declaring the Glory of God"**

Astronomy is the study of the galaxies, stars, planets, moons and ultimately the whole universe. In this presentation, you will learn how the wrong assumptions lead to wrong conclusions that don't fit the observations. We will consider questions like: Was there really a Big Bang? How do stars, planets, and moons form? What is Dark Matter and Dark Energy? Learn some of the biggest challenges to the naturalistic/evolutionary perspectives that could demolish the supposed billions of years of history.

Brian and Aimee Mariani were both raised with a solid foundation and a deep passion for God's word, science, and God's Creation. In public schools and secular universities, Brian saw the deception of evolution all around him. He later taught the credibility of creation and the pervasiveness of evolution from a Biblical perspective as a science teacher at a Christian high school. Aimee has spent many years teaching campers about God's creation at a Christian living history camp. They met at a Bible College that strengthened their creation worldview where Brian also had the opportunity to be one of the main researchers and contributors to the book, [The Genius of Ancient Man](#). Brian and Aimee joined AOI in 2013 because they have a passion to teach others about God through history, science, and His creation. They have been hard at work developing AOI's [Discover Creation Training Adventure](#).

**Was there really a
big bang?**

**How do stars,
planets and moons
form?**

**What is dark
matter and dark
energy?**

**What about
"billions of years?"**

**Brian is a "sought
after" speaker
from Alpha and
Omega Institute!**
